RISE UP FOR A FASTER CURE

THE BIGGEST
OBSTACLES
OUR LITTLEST ONES ARE FACING

#1 cause of death
by disease
among children
is cancer.

43 children per day
are expected to
be diagnosed
with cancer.

10 drugs have been
developed for use in
children with cancer
since 1980, as compared
to hundreds created for
adults.

4% of the billions of
dollars spent annually
on cancer research
and treatments is
directed towards
childhood cancer.

95% of childhood cancer
survivors will experience
significant health issues by
age 45 as a result of being
treated with drugs designed
specifically for adults.

THAT'S WHY YOUR SUPPORT IS SO CRITICAL

The National Pediatric Cancer Foundation is a nonprofit organization dedicated to funding research to eliminate childhood cancer. Over the past 30 years, with your help, we've donated millions of dollars to research and our ground-breaking clinical trials are saving many children's lives.

- We've been given the highest ratings a nonprofit can receive, including a 4-star charity rating by Charity Navigator; a Gold Level rating by GuideStar and accreditation from the BBB Wise Giving Alliance.
- 89¢ of every dollar spent supports our mission.
